

Jean-Max Dutertre is professor at Mines Saint-Etienne (MSE), he is the head of MSE' Secure Architectures and Systems (SAS) department. He works in the field of hardware security since 2008 with a focus on laser fault injection. He is the author or co-author of more than 50 LFI papers: from threat description and assessment, or modeling and simulation, to countermeasures design. He is an experienced practitioner of LFI as SAS operates several LFI benches.
