Dr. Gang Qu is a professor in the Department of Electrical and Computer Engineering at the University of Maryland, College Park. He has worked extensively in the area of hardware security and low power design with more than 300 publications and delivered more than 150 invited talks. He has also contributed in building the hardware security and trust community. Notably, he was an individual member of the VSIA intellectual property protection (IPP) working group (2001) and contributed to VSIA's IPP standards; he published the first book (2003) on hardware security, Intellectual Property Protection in VLSI Designs: Theory and Practice, based on his Ph.D. dissertation (2000); he developed a MOOC of hardware security on Coursera (2014) that has attracted tens of thousands of students all over the world; he co-founded the AsianHOST symposium (2016) and the IEEE hardware security and trust technique committee (HSTTC, 2020). He has led tutorials in many conferences including ASPDAC (2005,2020,2022), ISCAS (2016, 2017), VTTW (2017), DATE (2019), HOST (2020, 2022). He is currently leading the IV&V team on side channel analysis in the DARPA AISS project. Since October 2021, he has been working in the NSF SaTC program. He is a fellow of IEEE.
